SALE

Located in the popular area of Belleville which offers an excellent mixture of established Barbadian homes and more modern commercial properties, sits Shenstone. The main coral stone structure offers a significant 2-storey building blessed with large rooms throughout and some beautiful wooden floors. In its current set-up, a large L-shaped sheltered patio offers separate entry points to sizable living and dining rooms. This leads to a somewhat dated kitchen complete with a breakfast bar area. The bedrooms are all a very good size with the master being about 16'x 14' with a/c and an en suite bathroom with a shower. The other two bedrooms are approximately 16'x 11' and 15'x 10' respectively, and they share a more renovated bathroom. Downstairs consists of a large room that is about 22'x 15' and has its own direct access from outside. This room could be used as another bedroom, a large home office or a large play room. Extending toward the back of the property is a huge sheltered area adjacent to the house which could act as a large double car port or any amount of other alternatives. This in turn leads to some separate rooms and an additional large structure that is approximately 60'x 18' with several access points and bathroom facilities. This structure had been used a primary school for years, and quite recently has been left vacant. Outside of this
